

Kit # 105

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ☺ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 red top-folding card base
- 1 yellow (numbers)-patterned paper panel
- 1 yellow card stock panel
- 2 polka dot hexagons
- 3 green hexagons 3 red hexagons
- 3 blue hexagons
- 1 polka dot tag piece
- 1 Happy Birthday sentiment
- 1 white rectangle element
- 1 red ribbon
- 1 white envelope*
- Foam squares

Let's Begin!

We'll construct the card front first.

You'll need the yellow pattern paper, 2 red hexagons, 2 green hexagons, 2 polka dot hexagons, 2 blue hexagons, the red ribbon, the Happy Birthday sentiment, the white rectangle and polka dot tag piece.

1. First adhere the Happy Birthday sentiment to the white rectangle making sure to leave an even border of white showing along each edge.
2. Next arrange your hexagons and your ribbon how you want them on the yellow patterned panel. If you want to use my hexagon pattern, check the picture for reference.
3. Now that you know where everything is going to go - hold your ribbon in its position and turn that panel over. (yep, it'll all fall off lol) Use double sided tape to secure one end of your ribbon to the back of the panel where you want it. Stretch your ribbon tightly across the front of the panel and use double sided tape to secure the second end to the back of the yellow patterned panel.
4. Now that your ribbon is done, arrange your hexagons again. It's time to stick em down ;) And you want to see exactly where they go. Use 2 foam squares to adhere each hexagon to your panel. I recommend starting at the top and working your way down. And, it will line up best if you can keep the spacing even between each one.
5. Next adhere your layered Happy Birthday sentiment to the center of your polka dot tag. And adhere that to your card front panel over top of the ribbon, using foam squares.
6. The last thing you're going to do is adhere your completed card front panel to your red card base making sure to leave an even border of red showing along each edge.

Now let's decorate the inside of our card!

1. Adhere you're remaining hexagons as an added element of interest to your yellow card stock panel. This will be the inside of your card. To use my overlapping design, first adhere the blue one, next the green one, and lastly the red one.
2. Adhere your decorated yellow panel to the inside of your card base leaving an even border of res showing along each edge.

And you did it!
