

Kit # 108

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ☺ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 black top-folding card base
- 1 black dot patterned paper panel
- 1 vanilla card stock panel
- 3 scripted pattern hexagons
- 3 black hexagons
- 3 gray hexagons
- 2 rose gold hexagons
- 1 scripted patterned tag piece
- 1 Happy Birthday sentiment
- 1 black rectangle element
- 1 vanilla ribbon
- 1 black envelope*
- Foam squares

Let's Begin!

We'll construct the card front first.

You'll need the Black dot pattern paper panel, 2 black hexagons, 2 gray hexagons, 2 scripty hexagons, 2 rose gold hexagons, the vanilla ribbon, the Happy Birthday sentiment, the black rectangle card stock piece and scripty tag piece.

1. First adhere the Happy Birthday sentiment to the black rectangle making sure to leave an even border of black showing along each edge.
2. Next arrange your hexagons and your ribbon how you want them on the card. If you want to use my pattern, use the picture for reference.
3. Now that you know where everything is going to go - hold your ribbon in its position and turn that panel over. (yep, it'll all fall off lol) Use double sided tape to secure each end of your ribbon to the back of the panel making sure to stretch it snugly.
4. Now that your ribbon is done, arrange your hexagons once again. It's time to stick em down and you'll want to see exactly where they go. Use 2 foam squares to adhere each hexagon to your panel. I recommend starting at the top when you stick the hexagons down and work your way down. Also, it will line up best if you can keep the spacing even between each one.
5. Next adhere your layered Happy Birthday sentiment to the center of your scripty tag. And adhere that to your card front panel over top of the ribbon, using foam squares.
6. The last thing you're going to do is adhere your completed card front panel to your black card base making sure to leave an even border of black showing along each edge.

Now let's decorate the inside of our card!

- 1.1. Adhere you're remaining hexagons as an added element of interest to your vanilla card stock panel. This will be the inside of your card. To use my overlapping design, first adhere the gray one, next the black one, and lastly the scripty one.
2. Adhere your decorated vanilla panel to the inside of your card base leaving an even border of black showing along each edge.

And you did it!
