

# Kit # 139

## Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ☺ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 Cloud embossed panel
- 1 Scallop frame
- 1 Clear acetate panel
- 6 Rainbow pieces
- 1 Black stamped sentiment
- Sequins
- 1 Light blue panel
- 5 Cloud die cuts
- Foam strips (2 long, 2 short)
- Foam square
- 1 Mailing liner (mailing liner only needed if you mail your card)\*\*
- 1 Coordinating envelope\*

Let's Begin!

We'll construct the card front first.

You'll need the Card base, the embossed cloud panel, the scallop frame, the acetate, the rainbow pieces, the sentiment, the sequins, the foam square and the foam strips.

1. Let's begin by adhering the rainbow pieces to the cloud embossed panel. I did this by lining up the ends of my largest piece (the red) with the side and bottom of my cloud panel. This gave me good placement for all of the pieces.
2. Using a liquid glue, adhere the red arch in place so that the ends meet the edge of the panel. Next glue the other rainbow pieces in order from largest to smallest.
3. Now place narrow double sided tape right along the square cutout edge on the back of the scallop frame. Carefully place your acetate piece over the adhesive to cover the open square. This will create the window. This is hard to adjust once it's in place...something to keep in mind!
4. Your next step is to put the foam strips on the rainbow/cloud panel. Remove the release paper from the front and back of the strips and place them along the edges of the rainbow panel. This will create the space for your sequins to move. I tried to measure each strip so that they would fit together, but they might need a little trimming. Make sure to match each corner up carefully so that no space is left open. You don't want your sequins escaping!
5. Next, put the sequins on your rainbow panel. Make sure no sequins are on the foam strips. That needs to be clean of any debris for the next step.
6. Now, carefully set your scallop/acetate window on to the foam strips of your rainbow panel. This will seal your sequins inside. Take your time with this step. It's almost impossible to reposition the scallop frame once it's down. TIP: Sometimes it's helpful to apply a liquid glue over the foam adhesive to give some adjustment time. If you do that for this step, make sure you use only a little glue so that you don't risk it smearing onto

the acetate piece.

7. Using double sided tape, adhere the foam square to the back of the sentiment and then adhere your sentiment to the front of your card. Use example picture for placement ideas.

8. Your final step is to adhere your constructed shaker card front to the front of your card base.

### **Now let's decorate the inside of our card!**

1. Adhere the dark pink paper strip to the bottom of the light pink panel.
2. Adhere the dark pink bow to the center of the yellow gift die cut, then adhere the gift to the pink panel.
3. Now adhere this panel to the inside of your card.

**And you did it!**

**Thank you so much for crafting with me!  
Don't forget to use the hashtag #sandiscardscreations on  
instagram to share your finished product and be featured  
in my story!**
