

Kit #162

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive... But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 Gray card base
- 1 White pierced panel
- 1 Black Love die cut
- 2 Yellow circles
- 2 Brown die cut flower centers
- Flower petals
- 1 White panel, plain
- 1 Foam panel
- 1 Coordinating envelope*
- 1 Mailing Liner** (mailing liner only needed if you mail your card)

Let's Begin!

We'll construct the card front first. You'll need the white pierced panel, 1 yellow circle, 1 die cut flower center, flower petals and the Love die cut.

1. Let's begin by creating the full flower for the card front. You will make 2 layers of flower petals. One layer will be glued to the front of the yellow circle. One layer will be glued to the back of the yellow circle. Begin by adding a line of liquid craft glue along the outer edge of the yellow circle. Now add one end of a flower petal to the glue and position it outward. Next, add more petals, ONE at a time, to the glue and arrange them along the edge of the circle. Mix the color of the petals how you like and allow some petals to overlap a little for added interest. Allow the petals to dry before moving to the next step. TIP: Try to keep equal distance from the center of the circle for each petal, this keeps the flower circular.
2. Now turn the circle over and add a line of glue to the edge of the back of the yellow circle. Add petals to the circle just like you did on the front. NOTE: KEEP ALL PETALS FRONT FACING. So, from this side, you will be looking at the back of each petal. TIP: Periodically turn your flower over to check the petal placement from the front. While the glue is wet you will be able to adjust petal placement to keep the flower in a circular shape. See example picture for placement ideas.
3. To finish the flower, glue the flower center to the middle of your flower.
4. Now adhere the constructed flower to the white pierced panel. See example picture for placement ideas. Make sure to leave room for the Love die cut.
5. Using small dots of liquid glue, adhere the Love die cut across the bottom of the pierced panel. The ends will hang off each side. Turn the panel over and trim off excess.
6. Using small dots of liquid glue, adhere the Love die cut across the bottom of the pierced panel. The ends will hang off each side. Turn the panel over and trim off excess.

Now let's decorate the inside of our card!

1. Use the remaining flower pieces to construct a half flower the same way you made the full flower. Reserve the center die cut till the end.
2. Now adhere the half flower to the small white panel and trim any excess. See example picture for placement ideas. Finish by adhering the flower center die cut onto the half flower and trim any excess.
3. Adhere the decorated white panel to the inside of the card base making sure to leave an even border of gray showing along each edge.

And you did it!

**Thank you so much for crafting with me!
