

Kit #163

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 Dot panel
- 1 Phone die cut set
- 1 Piece of twine
- 2 Hello die cuts (1 gold, 1 white)
- Gold heart die cuts
- 1 Light blue panel
- Foam squares (and foam circle)
- 1 Foam panel
- 1 Mailing liner
(mailing liner only needed if you mail your card)**
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need the dot panel, the phone die cut set, the hello die cuts, the gold hearts, the twine and the foam squares.

1. Let's begin by constructing the phone. Adhere the rectangle backer behind the hole in the center of the phone base. Next, adhere the gold circle into the opening matching the open notch to the phone prong. Now adhere the white circle over the gold circle, tucking it under the prong. TIP: all of the open circles should be visible. See example picture for placement ideas. Finally adhere the small blue circle to the center.
2. To add the twine cord, adhere one end of the twine to the back of the left side of the phone base. Cut the twine to a desired length and adhere the other end to the back of the hand set die cut. See example picture for placement ideas. TIP: For Quick and Easy, tape it in place. I used a double sided tape.
3. Using small dots of liquid glue, adhere the white Hello die cut onto the gold Hello die cut, shifting it slightly to the right. This allows the gold to peek out like a shadow. See example picture for placement ideas.
4. Arrange the phone pieces and the layered Hello onto the dot panel to decide placement. Next adhere the phone to the dot panel using a liquid glue or a strong double sided tape.
5. Before adding the Hello, adhere the foam circle to the back of the 'O' in Hello. This will allow the height to be the same for the whole word. Now adhere the Hello to the card front panel. See example picture for placement ideas.
6. Finally decorate the panel with gold hearts, adhering them with a small dot of liquid glue. I've included extra in case you want more than three, OR for the inside of the card.
7. Adhere the foam panel to the back of the constructed card front and then adhere the card front to the card base. Make sure to leave an even border of white showing along each edge.

That's it! Now let's decorate the inside of our card.

1. Adhere the blue panel to the inside of the card base making sure to leave an even border of white showing along each edge.
2. Optional- decorate with gold hearts.

And you did it!
