Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 Peach dot panel
- 1 White slope piece
- 1 White floral die cut
- 1 Set floral die cut pieces
- 1 Hello die cut
- 1 Peach panel
- Foam squares, foam strips
- 1 Mailing liners (mailing liner only needed if you mail your card)**
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need the dot panel, the slope piece, the floral die cut piece, the set of floral die cut pieces, the foam squares and the hello.

1. Let's decorate the white floral die cut. Use the die cut set for this, adhering with small dots of a strong liquid craft glue. (TIP: Sometimes it's easier to add the glue to the white floral die cut piece and then place the added piece on top)
2. The die cut set includes 2 large detailed flowers. Adhere them together offsetting the smaller one on top. Then adhere the stacked flower to the large center flower. I offset mine so that the white background flower is showing. See example picture for placement ideas.
3. Next, adhere the 2 green stems over the coordinating stem places. Now adhere the small, notched circles to the branched stem. See example for placement ideas.
4. Finally, add the small flowers onto the coordinating spots. Include the center dot to fill out the flower. (Optional)
5. Next, use the large foam squares to adhere the white slope piece to the bottom of the peach dot panel. The long foam square goes along the bottom and the short one goes along the side. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
6. Now that the slope piece is in place, adhere the decorated floral die cut just above the slope allowing a small space to separate them. See example picture for placement ideas. Use the long foam strips to adhere the floral piece in place. These strips have adhesive on both sides. Use scissors to trim the foam strips to desired sizes to fit behind some of the sections. It isn't necessary to put foam behind every part of the floral die cut. Just enough to keep it supported.
7. Now adhere the Hello die cut to the card front panel. See example picture for placement ideas.
8. To finish, adhere the constructed card front to the card base. Align it at the fold edge. This way you can trim any overhang from the bottom edge if you want to.

That's it! Now let's decorate the inside of our card.

1. Adhere the peach panel to the inside of the card base making sure to leave an even border of white showing along each edge.

And you did it!

**Thank you so much for crafting with me!
