Kit #192

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ☺ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 White card base
2 White panels- 1 small, 1 large
2 Sets of Stripes- 1 small, 1 large
1 Set of 3 Peach hearts
2 Love die cuts- 1 black, 1 white
1 Sentiment strip
1 Set sequins and small foam square
1 Foam panel- adhesive backed
1 Mailing liner
(mailing liner only needed if you mail your card)**
1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need the larger white panel, the larger stripe set (the largest stripe of each color), the 2 Love die cuts, the sentiment strip and small foam square (optional), the heart die cuts and the sequins.

1. To begin, adhere the 3 hearts together with the smallest in the front. I centered mine but you can align them however you prefer.
2. Next, adhere the layered heart piece to the larger white panel so that it hangs off the edge. You should choose whatever placement you prefer. Once it's adhered in place, turn the panel over and trim the excess with a paper trimmer or scissors. See example picture for placement ideas.
3. For added dimension, adhere the white Love die cut to the back of the black one. Then, using small dots of liquid glue, adhere it to the decorated panel. See example picture for placement ideas.
4. Now add the sentiment. I used a small foam square (adhesive on both sides) towards the end of the sentiment to keep it all at one level. This step is optional.
5. To finish decorating the panel, use small dots of liquid glue to adhere the sequins.
6. Now it's time to adhere the large set of stripes (the largest stripe of each color) to create the dsign on the front of the card base. I recommend you work from the corner, up. TIP: these pieces fit together perfectly. If you are struggling to make them fit, you might need to flip it over or turn it upside down. Once you have the placement determined, adhere them in place. Trim any excess. See example pictures for placement ideas.
7. To finish the card front, use the foam panel to adhere the decorated panel to the front of the card base making sure to leave an even border showing along each edge. *One side of the foam panel is adhesive backed, you will need to add adhesive to the remaining side.

Now let's decorate the inside of our card!

1. Now it's time to adhere the small set of stripes to the inside of the card base. I recommend you work from the corner, up. TIP: these pieces fit together perfectly. If you are struggling to make them fit, you might need to flip it over or turn it upside down. Once you have the placement determined, adhere them in place. Trim any excess. See example pictures for placement ideas.

2. Adhere the remaining white panel to the inside of your card base, making sure to leave an even border showing along each edge. Adhere your white panel to the inside of your card base, making sure to leave an even border of black showing along each edge.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on instagram to share your finished product and be featured in my story!**

*Confirm postage needed when mailing
**mailing liner is used as a barrier over the card front to protect it during shipping
