Kit A

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ③ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 White card base

1 White panel with lines

1 Set of watercolor hearts

1 Black sentiment

1 Teal panel

1 Set foam squares

1 Mailing liner

(mailing liner only needed if you

mail your card)**

1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need card base, the white panel with lines, the hearts, the sentiment and the foam squares.

- 1. Begin by spending some time arranging the watercolor hearts on the lined panel. Pick an order and pattern that appeals to you. See example picture for placement ideas. TIP: I found that grouping them so that the lined panel created a "border" around them added to the vignette effect.
- 2. Once you've decided on placement, adhere them to the lined panel. Use some of the foam squares to pop up a few of the hearts for extra dimension and interest. See example picture for placement ideas.
- 3. Now, adhere the lined panel to the front of the card base making sure to leave an even border of white showing along each edge.
- 4. Finally, use foam squares to adhere the sentiment to the card front.

Now let's decorate the inside of our card!

1. Adhere the teal panel to the inside of your card base, making sure to leave an even border of white showing along each edge.

And you did it!

Thank you so much for crafting with me!
