Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive ☺ But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 Black card base
- 3 White panels (large, medium and small)
- 1 Lime panel
- 11 Colored strips
- 1 Set of leaf die cuts (including a large turquoise leaf stem for the inside of the card)
- 1 Celebrate sentiment with black backer
- Foam panel
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need the large and medium white panels (the smallest panel is for the inside of the card), the colored strips, the sentiment and backer, the foam panel and the leaf die cuts (except 1 large turquoise stem).

1. Let's begin by creating the striped panel. In the example, you see the striped panel that has been trimmed and tilted to sit diagonally. To create the original panel, you will lay the strips horizontal. To do this, adhere the colored strips to the largest white panel. They will stretch lengthwise over this panel. Take care to adhere the first strip exactly along the top edge of the panel. This will ensure all strips after the first lay straight. See example picture for color pattern ideas.
2. Now you will trim your striped panel. To do this, align it diagonally over the MEDIUM sized white panel. The center stripe should sit approximately over the diagonal center of the panel. Holding the two panels in place, turn them over to see the overhanging edges. Trim the striped panel where it hangs over so that it will only reach edge to edge of the white panel. TIP: To make the trimming easier, you can use a temporary adhesive to hold the panels together OR lightly draw a cut line where the edge of the panel is- then trim.
3. Next, use a double sided tape or liquid glue to adhere the foam panel to the back of the striped panel.
4. To arrange everything, align the striped piece on the medium white panel (do not adhere it yet). Now add the leaf die cuts in the arrangement you prefer. See example picture for placement ideas.
5. Once you've decided on placement, remove the release paper from the back of the foam panel and add the leaves to the foam's adhesive where you want them. You can also add a liquid glue to give more time for adjustment if needed.
6. At the same time, add the decorated striped piece to the medium white panel. Align the left and right corner of the striped piece to the panel and be careful to not let the leaves overhang too far. The card will still need to fit into the envelope lol. See example picture for placement. The combination of these elements make up the card front.
7. Once the card front has been completed, adhere it to the card base making sure to leave an even border of black showing along each edge.
8. To finish it, adhere the white Celebrate to the black backer leaving an even border of black showing along each edge. Then adhere the layered sentiment to the front of the card.

Now let's decorate the inside of our card!

1. Adhere the remaining (smallest) white panel to the lime panel, making sure to leave an even border of lime showing along each edge.
2. Now adhere that layered piece to the inside of the card base making sure to leave an even border of black showing along each edge.
3. To finish, add the remaining turquoise leaf stem for decoration.

And you did it!
