

Kit 198

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 Flower panel
- 1 Green panel
- 5 Grass tufts
- 4 Bunnies
- 7 Flowers (with centers)
- 1 Stamped sentiment
- 1 Blue panel
- 1 Foam strip- adhesive backed
- 1 Foam panel- adhesive backed
- 1 Mailing liner
(mailing liner only needed if you mail your card)**
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need flower panel, green panel, 1 large grass tuft, 2 small grass tufts, 3 bunnies (see picture for reference), all flowers except the yellow one with white center, the sentiment, and the foam pieces.

1. Begin by adhering the green panel to the flower panel. They should align along the bottom and sides.
2. Next, adhere the flower centers to the flower die cuts. All flowers have yellow centers. The remaining yellow flower with white center will be used to decorate the inside of the card.
3. Arrange the scene on the layered flower panel. You will need to decide placement for the grass, the flowers, the bunnies and the sentiment. The sentiment will be adhered with the thin foam strip. Allow some items to overlap each other to create dimension. See example picture for placement ideas. Once the placement has been decided, adhere the elements in place starting with the items that sit behind others. Sometimes it's easier to just lift an edge and tuck an element behind something else. Work in the way that's best for you. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
4. Adhere the decorated panel to the card front using the foam panel for added dimension. There should be an even border of white showing along each edge. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.

That's it! Now let's decorate the inside of the card.

1. Use the remaining bunny, flower and 2 grass tufts to decorate the blue panel.
2. Adhere the decorated panel to the inside of the card base.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on
instagram to share your finished product and be featured
in my story!**

*Confirm postage needed when mailing
**mailing liner is used as a barrier over the card front to protect it during
shipping
