Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 Black card base
- 1 White decorated panel
- 1 White panel with flowers (for inside)
- 1 Bicycle die cut
- 3 White flower die cuts
- 3 Vellum flower die cuts
- 1 Stamped sentiment
- 6 Gems
- 1 Foam strip
- 1 Mailing liner
(mailing liner only needed if you mail your card)**
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need all elements except the white inside panel.

1. Begin by choosing a general placement for the card front elements.
2. Next, adhere the flowers together to create 3 double layered flowers. Use the coordinating vellum flower with the matching white one and offset them from each other for added interest. See example picture for placement ideas. (I used a small dot of liquid glue for this)
3. Adhere the bicycle die cut to the decorated panel allowing some to hang off the edge. Leave some of the basket free to tuck a flower inside. Trim any excess.
4. Now adhere the flowers. Only add glue to the center of the flower so that the petals can lift a little for added interest. See example picture for placement ideas.
5. Use the foam strip to adhere the sentiment to the panel. TIP: Keep the sentiment all one level by not adding foam to the flower.
6. Finish the panel by adding gems for decoration. These are adhesive backed but a small dot of glue may still be needed.
7. Adhere the decorated panel to the front of the card base making sure to leave an even border of black showing along each edge.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining white panel to the inside of the card base making sure to leave an even border of black showing along each edge.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on
instagram to share your finished product and be featured
in my story!**

*Confirm postage needed when mailing
**mailing liner is used as a barrier over the card front to protect it during
shipping
