Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 White card base
1 White panel with a cutout
1 Multicolor inked panel
1 Set of undersea die cuts
1 Stamped sentiment
1 Dark blue panel
1 Light blue panel
1 Set foam pieces- adhesive backed both sides
1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.
You'll need the card base, the white cutout panel, the multicolored panel, the undersea die cuts, the sentiment, and the foam pieces (for white cutout and sentiment).

1. To begin, adhere the multicolored panel to the front of the card base making sure to leave an even border of white showing along each edge.
2. Next, use the foam pieces to adhere the white cutout piece to the front of the card base. This should sit just slightly larger than the multicolored panel. NOTE: Leave some of the foam adhesive to use on the sentiment.
3. Now, use the undersea elements to decorate the scene and adhere them down. Consider adhering something to the outside of the cutout for added interest. See example pictures for placement ideas.
4. Use the remaining foam adhesive to adhere the sentiment strip to the front of the card. See example for placement ideas.

That's it! Now let's decorate the inside of the card.

1. Adhere the light blue panel to the dark blue panel.
2. Add the layered blue panel to the inside of the card base making sure to leave an even border of white showing along each edge.

And you did it!

Thank you so much for crafting with me!
