March Kit B

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 White card base
2 Light blue panels, 1 with clouds
1 White frame
2 Grass borders (1 high, 1 low)
5 Cloud die cuts (3 small, 2 large)
1 Set of flowers and flower centers
1 Swing set (2 side ropes and 1 seat piece)
1 Bunny set (2 ears with pink centers,
2 hands, 1 body with pink center, 1 face)
1 Swing mechanism die cut set
(1 cross piece, 1 circle)
1 Foam square
1 Mailing liner
(mailing liner only needed if you
mail your card)**
1 Coordinating envelope*

Let's Begin!
We'll construct the card front first.

You'll need the blue cloud piece, the white frame, the low grass border, the cloud die cuts, the flowers and their centers, the bunny set, the swing set, and the swing mechanism with foam square.

1. To begin, adhere the low grass border along the bottom of the cloud panel at your preferred height. Turn panel over and trim any excess.
2. Now, let's put the bunny together. Add the pink centers to the ears and the pink belly to the body. Adhere the ears to the back of the head, offsetting the ears for added interest. Next, adhere the head to the top of the body so that it sits over the top of the pink belly piece. Finally, add the arms (with the hands out) by adhering them to the back of the body. I angled mine slightly different from each other to add interest.
3. Next, add the bunny to the swing. To do this, construct the swing by adhering the left and right side ropes to the seat piece with a small dot of liquid glue. Hold in place until dry. TIP: The side ropes should angle in towards the bottom. See example picture. Now, adhere the bunny feet to the swing seat. Finally, gently separate the hands from the arm where the paper is cut. Carefully slide the swing ropes under the bunny hands.
4. Now, adhere the swing side ropes to the ends of the cross piece. See example picture. Choose the placement based on your design preference. It will determine how far down the swing sits on the card front. Trim any excess.
5. Choose the placement of the swing (using the cloud die cuts for placement help). Add the foam square (hexagon) to the inside of the open cross piece circle. Rotate the swing mechanism left and right to ensure it will move smoothly. Remove the foam square release paper and add the white die cut circle onto it. This will lock the swing mechanism in place. We will use the clouds to cover this as decoration.
6. Choose the design of the clouds and adhere them in place over top of the swing mechanism. Take care not to impede the swivel action of the swing. See example picture for placement ideas.
7. Add any remaining clouds to the cloud panel, trimming them as needed. See example picture for placement ideas.
8. Next, add flowers to the grass border and to the bunny (optional) and finish them with the coordinating centers. Trim any excess.
9. Finally, adhere the white frame onto the constructed card front and adhere the card front to the front of the card base making sure to leave an even border of white showing along each edge.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining grass border to the remaining blue panel. Trim any excess.
2. Add flowers and their centers for added decoration.

And you did it!

**Thank you so much for crafting with me!
