

Nov'23 Kit A

Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 Kraft brown card base
- 2 White panels (1 lg, 1 sm)
- 1 Clear acetate panel
- 1 Kraft tree panel
- 1 White frame
- 1 Goodie bag (2 Very Merry, 1 vellum backer, white trees, silver accents, kraft trees)
- 1 Bag of shaker bits
- Foam strips- adhesive backed
 - 2 sides
- 1 Mailing Liner**
- 1 Coordinating envelope*

Let's Begin!

We'll construct the card front first.

You'll need all pieces except the large white panel and the kraft brown tree accents.

1. Begin by adhering the clear acetate panel to the back of the kraft tree panel. TIP: use a strong double sided tape to avoid drying time
2. Next, you will create the shaker box. Stack 2 layers of foam strips along each side of the small white panel. The strips will need to be trimmed to size. Take care to close all corners so that the shaker pieces can't escape. See picture for guidance.
3. Remove the release paper from the foam strips and carefully empty the shaker bits into the "box". To close the "box" you will add the kraft tree panel, centered, over top. I recommend standing over the project at this point to see better. There will be some overhang of the tree panel because it is larger than the white box panel. TIP: Adding liquid glue over the foam strip adhesive can offer some wiggle room
4. Adhere the constructed shaker box to the front of the card base making sure to leave an even border of kraft showing along each edge.
5. Using a light application of glue, add the white frame to the card front.
6. Adhere the two Very Merry sentiments to each other for added dimension and then adhere them to the vellum backer.
7. Optional- Use some of the remaining foam strip pieces to adhere the sentiment to the front of the card. If you'd prefer it, you can adhere it flat. Take care to only add adhesive to the back of the words, otherwise it will show through the vellum paper.
8. Using small dots of liquid glue adhere the white tree accents and the silver embellishments to the front of your card. See example picture for placement ideas.

That's it! Now let's decorate the inside of the card.

1. Adhere the large white panel to the inside of the card making sure to leave an even border of kraft showing along each edge.
2. Lastly, add some kraft brown trees for decoration. See example picture for placement ideas.

And you did it!

Thank you so much for crafting with me!
