Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 White card base
1 Dark green panel
1 Green and white panel
1 Green and white panel with words
1 Lattice piece
1 Frame
3 Leaf die cuts (2 lg, 1 sm)
1 Butterfly die cut set
1 Gold embellishment set
1 Set of foam strips-
adhesive backed
1 Coordinating envelope*
1 Mailing Liner**

Let's Begin!
We'll construct the card front first.

You'll need everything except the green and white panel with words on it. This will be used for the inside of the card.

1. Let's start with the butterfly. The bottom and top sections of the butterfly have 3 layers each. Adhere them in order from largest to smallest, aligning them to the inside edge. Then adhere the top wings to the bottom wings, at the narrow cross piece. See example picture. To finish the butterfly, adhere the butterfly body die cut to the center of the wings.
2. Next, adhere the lattice piece to the green and white panel. It should align edge to edge, but if there is any overhang, trim any excess.
3. Now, using the butterfly to help with placement, adhere the 3 leaf die cuts to the layered panel, letting them overhang the edge. Trim any excess. See example picture.
4. Next, use the foam strips to adhere the white frame to the decorated panel. Trim the foam to fit the frame sides and save the remaining foam. This will be used to adhere the butterfly. The foam strips have adhesive on both sides.
5. Add the butterfly to the decorated panel using the foam adhesive for extra dimension.
6. Now, adhere the dark green panel to the front of the card base. It should align edge to edge.
7. Adhere the decorated panel to the front of the card. You should see a small, even border of the dark green showing along each edge.
8. To finish the card, use small dots of liquid glue to add the gold embellishments. Use as many or as few as you like. See example picture for placement ideas.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining green and white panel to the inside of the card, making sure to leave an even border of white showing along each edge.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on instagram to share your finished product and be featured in my story!**
