Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 White backer panel
- 1 Set stripes (4 white, 3 black, 2 narrow black)
- 1 Set white cupcake wrappers
- 1 Set colorful cupcake frosting
- 1 Set red pom poms
- 1 Set foam squares- adhesive backed
- 1 Black panel (inside)
- 1 White rainbow splatter panel (inside)
- 1 Jumbo cupcake frosting set
- 1 Jumbo cupcake wrapper set
- 1 Cherry die cut
- 1 Coordinating envelope*
- 1 Mailing Liner**

Let's Begin!

We'll construct the card front first.

You'll need the white backer panel, the stripes, the cupcake wrapper set, the cupcake frosting set, the foam squares and the red pom poms.

1. To begin, you will construct the striped background panel. To do this, you will layer the stripes onto the plain white panel. It will be your backer. Begin at the bottom with one of the narrow black stripes. Take care to line this up straight along the bottom edge of the panel. I purposefully make the stripes long, allowing it to hang over on the left and right edges to be trimmed later. This helps to get a straighter edge in the end. Once the first stripe is set up correctly, the rest should line up straight, as well. TIP: Using a liquid glue will allow you to adjust the placement
2. Next, adhere the other stripes in the color pattern, alternating black and white. Reserve the remaining narrow black piece for the last stripe. See example picture. Trim any excess. To do this, you can use scissors or a paper trimmer.
3. Adhere this striped panel to the front of the card base. It should align edge to edge.
4. Now, let's construct the cupcakes. Each cupcake has a 2 piece wrapper set. The wrapper has a lined front piece and a solid backer piece. Adhere each lined front wrapper piece to a coordinating backer. I recommend a liquid glue for this.
5. To construct the frosting pieces you will need to use their numbers to find the coordinating sets. Each frosting backer has a number on the front. Each frosting swirl has a number on the back. When you adhere the matching set, the numbers should be covered and the edges should align. Using a light application of glue and adhere the coordinating frosting sets together.
6. Next, adhere the frosting tops to the wrappers just over the top edge. See example picture. Now your cupcakes are finished.
7. Using the foam squares, adhere the finished cupcakes to the card front. Keep in mind you will need a little room at the top for the red pom poms to fit. I recommend laying them out how you like them first, and then adhere them in place. See example picture for placement ideas. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
8. To finish the card, use a liquid glue to adhere the red pom poms above each cupcake. See example picture for placement ideas.

That's it! Now let's decorate the inside of the card.

1. Adhere the white splatter panel to the black panel making sure to leave an even border of black showing along each edge.
2. Add the layered panels to the inside of the card making sure to leave an even border of white showing along each edge.
3. Next, adhere the jumbo cupcake pieces together as you did the small cupcakes. Add the cherry die cut to the top. See example picture for placement ideas.
4. Add the jumbo cupcake to the inside of the card. Trim any excess. See example picture for placement ideas.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on
instagram to share your finished product and be featured
in my story!**
