Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 Black card base
- 1 White panel- brick lines
- 1 White panel- plain (for inside)
- 1 Set White brick pieces (9 short, 7 long)
- 1 Set Red brick pieces (6 short, 2 long)
- 2 Taco die cut sets (yellow shell, green lettuce)
- 1 Plate die cut set (large gray, small gray ovals)
- 1 Sign die cut set (sign board, frame, sentiment arch, letter stickers)
- 2 Banner die cut sets (ribbon, 6 flags, 2 bows)
- Foam squares-adhesive backed
- 1 Coordinating envelope*
- 1 Mailing Liner**

Let's Begin!

We'll construct the card front first.

You'll need the brick lines panel, the white and red brick pieces, the tacos die cuts, the plate set, 1 banner set, the sign die cuts, and the foam squares.

1. Let's start with the brick background panel. To make this, you will need the white panel with the brick lines on it and the white and red brick rectangle pieces. During the cutting process I noticed that some of the paper was slightly damaged on the backside of the bricks. If your brick has a rough side, you will need to turn it over and use the reverse side. The brick background pattern has been lightly debossed on the white panel. This is your template for your bricks. Adhere the white and red bricks onto the panel. I have included a picture of my pattern for you to follow. The bricks will hang over the edge of the panel, trim any excess.
2. Next, construct the sign. Adhere the brown frame to the black sign board. Use the letter stickers to add the word 'TACOS' to the center of the sign board. Now, adhere the sentiment arch at the top of the sign. See example picture.
3. To make the tacos, adhere the yellow "tortilla" over the green "lettuce" piece. They should align edge to edge, leaving some green showing at the top.
4. Make the plate by adhering the small dark gray oval onto the front of the large gray oval.
5. Add the tacos to the plate. I recommend using a light application of liquid glue to allow time to adjust the placement. See example picture for placement ideas.
6. Construct the banner by adhering the flag pieces to the ribbon piece. I recommend that you place the flags at the top edge of the ribbon so that the black ribbon doesn't show. I used a red, yellow, green pattern, but there are several patterns that could work! *DO NOT add the bows yet. Those will go on after the banner is on the card.
7. Adhere the brick background panel to the front of the black card base making sure to leave an even border of black showing along each edge.
8. Adhere the plate of tacos to the card front using the thin foam square. See example picture. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
9. Now, adhere the banner to the front of the card. I chose to drape mine at an angle, but there are lots of cute positions. Once you have your banner in place, add a bow to each side. You will notice that the bows have a longer ribbon on one side. I recommend that the bows are positioned so that the longer ribbon lays to the outside edge. See example picture.
10. Using the large foam square, adhere the sign onto the card front. See example picture. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.

That's it! Now let's decorate the inside of the card.

1. Construct the remaining banner pieces the same way you did before and add it to the remaining white panel. See example picture for placement ideas.
2. Add the decorated panel to the inside of the card making sure to leave an even border of black showing along each edge.

Thank you so much for crafting with me!

Don't forget to use the hashtag #sandiscardscreations on instagram to share your finished product and be featured in my story!
