Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 White panel- Deckle edge
- 1 Sunset panel
- 1 Set mountain scene layers (6 pc.)
- 1 White panel - plain (inside)
- 1 Set hillside scene layers (for the inside- 2 pc.)
- 1 Coordinating envelope*
- 1 Mailing Liner**

Let's Begin!

We'll construct the card front first.

You'll need the white deckle edge panel, the sunset panel and the mountain scene layers. The mountain scene layers are: the full mountain piece with its lighter color highlight piece, the purple hillside that will nest into the mountain highlight piece, the half hillside, the short cactus layer and the black cactus layer. (Due to a supply issue, the papers may vary from the example)

1. Let's start by building the scene. There are six layers to the front mountain scene. The remaining two layers are to be used inside the card for added decoration. Confirm you have the right layers described in these instructions and by using the example picture for reference.
2. Adhere the largest mountain piece to the sunset panel. It should fit edge to edge along the bottom and sides. If there is any excess, trim it now.
3. Next, adhere the mountain highlight piece to the mountain. It will sit along the top edge of the mountain and reach out to the sides. See example picture.
4. Now, fit the purple hillside into the space left on the mountain. It should nest like a puzzle piece and fit edge to edge. Adhere in place.
5. The next three mountain scene layers will lay on top of each other. First adhere the half length hillside aligned with the right edge and bottom. See example picture.
6. Next, adhere the short cactus layer along the right edge and bottom. This layer is the darkest purple.
7. Finally, add the black cactus layer across the bottom. It should align edge to edge.
8. Now adhere the decorated sunset panel to the white deckle edge panel making sure to leave an even border of white showing along each edge.
9. Adhere the card front to the card base. Do this by centering the card base onto the back of the card front. This way it allows the deckle edge to be seen on all sides.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining two hillside layers onto the white panel. Align them along the bottom and right edge of the panel. See example picture.
2. Add the decorated panel to the inside of the card making sure to leave an even border of white showing along each edge.

And you did it!

**Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on
instagram to share your finished product and be featured
in my story!**

**All instructions can be found on the Card Kit
Instructions page at sandiscards.com**

***Confirm postage needed when mailing
**mailing liner is used as a barrier over the card front to protect it during
shipping**
