Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 Blue card base
3 White beach hut backers
3 White beach hut roofs
3 Beach hut doors
2 Gray stripe hut fronts
1 Yellow stripe hut front
2 Large clouds
2 Small clouds
1 Sun die cut
1 Bird die cut
1 Blue rectangle piece
3 Brown rectangle pieces (small, medium, and large)
1 Umbrella die cut set (backer, 2 stripes)
1 Door knob die cut
1 Round window die cut
1 Sending you sunshine sentiment
1 Foam strip-adhesive backed
1 Coordinating envelope*
1 Mailing Liner**

Let's Begin!
We'll construct the card front first.
You'll need everything but the small brown rectangle and 1 small cloud.

1. Let's construct the 3 beach huts first. To do this, layer one striped hut front to a white hut backer. It should leave a white border on each side. Next add a hut roof to the top. The roof will overhang on both sides and the flag will face to the right. Finally add a door to each hut in the center. See example picture.
2. To decorate the yellow hut door, use a light application of glue to add the door knob and circle window.
3. Let's begin to build the scene. Adhere the blue rectangle along the bottom of the card front. It will overhang the edge. Trim any excess. This will create a background water layer.
4. Next, add the large brown rectangle piece. It has a torn edge. Add this over the blue piece aligning it along the bottom edge. Trim any excess. This is your background sand.
5. Now, using your beach huts to help with placement, adhere the clouds and sun in the sky. I used 1 large and 1 small cloud on the left side of the sky. Then I used the 2nd large cloud and tucked the sun behind it, on the right. Allow the clouds to overhang the edge for added interest. Trim any excess and reserve it to help decorate the inside of the card. NOTE: The sun die cut has an irregular section. Make sure that it is hidden behind a cloud.
6. Adhere the 3 beach huts to the front of the card. I recommend placing the yellow one first. It will not sit at the bottom edge of the card. Instead it will be raised some to allow it to be fully seen while leaving room for the sentiment. Check the placement of the beach huts with the 2nd brown rectangle piece. Use the one without a torn edge. See example picture for placement help. Trim all excess when the huts are in place. Reserve the cut pieces to help decorate the inside of the card.
7. Add the Sending You Lots of Sunshine sentiment to the medium brown rectangle piece that is not torn. See example picture for placement help.
8. Using the foam strip, adhere the decorated sentiment rectangle to the front of the card. I set mine to barely cover the bottom edge of the beach huts and then trimmed any excess. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
9. To construct the umbrella, adhere the left and right stripes to line up with the arch of the umbrella edge. See example picture.
10. To finish, add the umbrella and the bird to your scene.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining torn edge brown rectangle to the inside of the card. Do not add adhesive to the top edge. This will allow you to tuck the beach hut pieces in behind it. Trim any excess.
2. Use the trimmed beach hut and all cloud pieces for added decoration. See example picture for placement ideas.

And you did it!

Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on instagram to share your finished product and be featured in my story!
