Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

1 Turquoise card base
2 White panels
1 Set of stamped flowers
1 Set of stamped stems
1 Celebrate word die cut set
Enamel dots
Foam squares
1 Coordinating envelope*
1 Mailing Liner**

Let's Begin!

We'll construct the card front first.

You'll need all elements except 1 white panel, 1 small flower and 1 small stem.

1. To create the decorative front panel, you will add flowers and stems and adhere them using the foam squares that I've provided. I used foam squares under the flowers and also the leaves but left the stems to lay flat. If you would like to copy my design, see the example picture below. Trim any excess.
2. Add the decorated white panel to the front of the card base making sure to leave an even border of turquoise showing along each edge.
3. Adhere the black Celebrate die cut to the white backer and add it to the front of the card with foam squares.
4. Finish decorating the card front with the adhesive backed enamel dots included in your kit. See example picture for placement ideas.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining flower and stem to the white panel and trim any excess.
2. Adhere this to the inside of the card making sure to leave an even border showing along each edge.

Thank you so much for crafting with me!
Don't forget to use the hashtag #sandiscardscreations on instagram to share your finished product and be featured in my story!
