Let's Make Beautiful Things Together

Just some info: ADHERE means to stick your card elements together using a tape runner, a double sided tape, a liquid craft glue or any combination of those. If I specify a type of adhesive, that's because the situation will work BEST using the recommended adhesive. But you can always just use what you have!

Where to Start?

First confirm you have all card elements and pre-plan your card layout. Just to get an idea of how you want it to look.

Contents:

- 1 White card base
- 1 Light blue panel, embossed
- 1 Light blue panel, plain
- 3 White hillsides
- 1 White square
- 1 White frame
- 1 Peace goodie bag (silver peace, 3 white trees, 2 silver snowflakes)
- 1 Foam square
- 1 Coordinating envelope*
- 1 Mailing Liner**

Let's Begin!

We'll construct the card front first.

You will need everything except the plain blue panel and the extra bumpy hillside.

1. To begin, adhere the two matching hillsides together. You will see that they gently match the slope. The remaining white hillside piece will be used to decorate the inside of the card. You will notice that its slope pattern doesn't match the same. Adhere the matching hillsides together by aligning them along the bottom and the rounded lefthand corner.
2. Next adhere the layered hillside set to the embossed blue panel aligning it along the bottom and the rounded lefthand corner. Trim any excess. NOTE: Leave a free edge at the top so that you can tuck the white trees behind the hillside. See example picture.
3. Now adhere the decorated panel to the front of the card base making sure to leave an even border of white showing along each edge.
4. Tuck the tree die cuts behind the hillside and adhere them in place. See example picture for placement ideas.
5. To build the sentiment, adhere the white frame to the white rectangle. Next, use small dots of liquid glue to adhere the silver Peace word inside the frame piece. See example picture. Note: your sentiment will look different than the sample due to a product replacement situation. Sorry.
6. Adhere the sentiment to the card front using the foam square. *One side of the foam is adhesive backed, you will need to add adhesive to the remaining side.
7. Lastly, adhere the snowflakes for added decoration.

That's it! Now let's decorate the inside of the card.

1. Adhere the remaining white hillside to the plain blue panel aligning it to the bottom left corner. Trim any excess.
2. Now, add the decorated panel to the inside of the card base making sure to leave an even border of white showing along each edge.

You did it!

**Thank you so much for crafting with me!
